<p>Peak Incident YearPeak Incident Years (2016-2022):</p> <p>Incident counts were consistently highest between 2016 and 2022, suggesting a period of increased activity.</p> <p>Dark(er) shades in this period indicate a higher density of incidents across multiple months.</p>	<p>Incident counts drastically decline in 2024 and 2025, with very low numbers recorded in early 2025.</p> <p>This suggests missing or incomplete data rather than an actual reduction in incidents.</p>
<p>Seasonal Trends:</p> <p>January, March, July, and September show higher incident occurrences, indicating possible seasonal patterns.</p> <p>December generally has lower incidents, suggesting a potential decline in activity toward year-end.</p>	<p>Data Filtering Options:</p> <p>The ability to filter by victim's sex, ethnicity, and weapon usage allows for deeper demographic analysis.</p>

Total Weapon-Related Cases	Distribution of Weapon-Related Cases	Weapon Breakdown & Criminal Charges
A total of 347,515 weapon-related cases have been recorded, showing an increasing trend over the years. Firearms, especially air pistols and handguns, are the most commonly used weapons. The data highlights a rising concern for public safety and law enforcement interventions.	Out of 3,098,304 recorded cases, 88.78% involve high-risk weapon-related incidents. This distribution emphasizes the prevalence of firearm-related crimes and the importance of law enforcement and community safety measures.	Firearms, blunt instruments, and chairs are frequently used in violent crimes. Battery - Simple Assault leads with 263,518 cases, followed by assault with deadly weapons and threatened robbery. These statistics underscore the need for better crime prevention and stricter law enforcement measures.
